

FAST BATCH MIXING FOR AG AIRCRAFT

FEATURES

-  **300 gallon heavy duty batch tank**
-  **Rapid discharge through 3" flange connection allows tank to empty in under 2 minutes with appropriate transfer pump**
-  **High speed mixer with corrosion resistant stainless steel shaft and turbines**
-  **Optimal design for user selectable upward or downward mixing - up to minimize turbulence during agitation or down for the rapid incorporation of product.**
-  **Jug punch with built-in rinse to quickly add liquid chemicals into tank mix**
-  **Two low height 16" openings for easy dumping of bags and jugs**
-  **Single point fresh water connection for convenient tank and equipment rinsing**
-  **Top-center mounted rinse spinner reduces product loss by rinsing tank walls during transfer**
-  **Fast acting flip style valves for all rinsers**
-  **2" FNPT port for fast tank fill**
-  **Powered through a standard 120 volt outlet**
